Application	Floors and walls, indoor; residential and commercial
Suggested rooms	Bathrooms, showers, kitchens, backsplashes, living areas, feature walls
Origin	Made in Italy

INSTALLATION & CARE

- Blend tiles from several boxes during installation to distribute natural shade and vein variation.
- Large formats (24x48): use a flat, level substrate, large-format thin-set mortar and a leveling system.
- Recommended minimum grout joint: 2 mm (1/16") for rectified tiles. Use non-sanded grout on polished surfaces.
- Polished finishes are best for walls and low-traffic dry floors; choose Matte for wet floors.
- Clean with pH-neutral cleaners. Avoid acids, abrasive pads and wax-based products.
- Order 10-15% extra to cover cuts and future repairs. Inspect tiles before installation.

Product images and color swatches are for reference only; natural variation in shade and veining is a characteristic of this collection.
